

Domaine Calage Ressequier

Climate and exposition Mediterranean climate beautifully adapted to vine cultivation: this plant, once introduced to the Mediterranean region, found its land of predilection.

Nature of the soil and relief Hillside vines:

- clayey limestone in the scrub land of the Montpellier hills
- schistous on the banks of the Salagou lake.

Surface · Total surface area of the estate : 8 ha ha

· Surface under vine : 8 ha ha - including AOC : 6 ha ha

Average yield (hl) 210 HI

Vine growing traditional growing, environmental friendly growing, monitoring

Adult vines, parcels with very low natural yield. Mechanical soil labouring. No fertiliser, only organic soil improvement matter in order to improve soil condition and allow the best expression of the environment.

Use of models simulating vine diseases backed up by climate data recorded by our agro-meteorological station: reasoned protection.

Winery

Vats oak, other

Vinification maceration, Rosé winemaking (15%), Red winemaking (75%), White winemaking (10%), temperature control

Maturing in vats (50%), in barrels (50%)

Packaging estate bottled, to be filled

Red Laurus Nobilis

A.O.C Slope of Languedoc

A majority of grenache assembled to the syrah gives during fermentation a complexity of flavours.

This female wine aromatic and easy to drink is used for 16°.

It will agreeably accompany sauce fish and the meats.
